

Wenatchee River – Peshastin

Description: The Peshastin drainage includes Wilderness, Inventoried Roadless Area, several trailheads, numerous mining claims, and is checker-boarded with private property. High use roads and ORV trails have been treated for invasive species infestations over the years.

Infested acres: 6.4

Total acres: 63215.78

5th Field watershed: Peshastin Creek 1702001105

Major Streams and Waterbodies: Peshastin Creek, Ingalls Creek

Elevation: 1400 - 9400

Vegetation Type: Aquatic Emergent, Douglas-fir, Grand fir, High elevation herbaceous and shrub opening, Low elevation grassland, Montane herbaceous opening, Montane Shrub, Mountain hemlock Pacific silver fir, Parkland, Ponderosa pine, Riparian and Deciduous, Shrub steppe, Subalpine fir Urban-Agriculture, Western hemlock, Wetland

Soils: Silt loam, Sandy loam, Loam, Fine sandy loam, Loamy sand

Special Management Areas: Critical habitat

Recreation: Hiking, mountain biking, camping, dispersed camping, hunting, fishing, livestock, backpacking, ORV, snowmobiling, mushroom collecting, skiing, mining.

Grazing: Stafford

TES, ISSSP Species: *Cypripedium fasciculatum*, *Delphinium viridescens*, *Iliamna longisepala* *Sidalcea oregana* ssp. *oregana* var. *calva*

Other land Ownerships: Private

Vectors of spread: Vehicle traffic, recreational use, livestock, fire suppression, wildlife

Ongoing Treatments: Chemical and manual

IWM Strategy: Monitor for new species and/or infestations and treat either manually or chemically; control existing infestations

Existing Sites and Treatment Objectives

Code	Common Name	# of sites	Gross acres	Net acres	Site Types	Objectives
ARAB3	absinthium	2	1.61	0.05	1,6	Control
CIVU	bull thistle	12	39.78	0.58	1,6	Tolerate
CIAR4	Canada thistle	6	3.25	0.33	1,3,5,6	Tolerate/Suppression
CIIN	chicory	1	0.17	0.00	1	Containment
HYPE	common St. Johnswort	3	0.96	0.11	1,5	Containment

LIDA	Dalmatian toadflax	11	20.19	0.54	1,3,5	Control/Sup pression
