

Printing Maps on a Desktop Printer:

"Maps 8x11 Format".

Map A1, Map A2, and Map B are broken out by USGS quad ("map bundle") to print on 8.5"x 11" paper.

Quad maps are bundled by Map (Map A1, Map A2, Map B)

The quad maps within each bundle are named according to their USGS Quad name.

A "Quad Locator Map" is provided within each map bundle to assist in identifying which quad to select.

Legends for each of the maps (A1, A2, B) are bundled with their respective map quads.
